

PLANET LIGHTING

ULED EXAMINATION LIGHT

ULED is a significant step beyond traditional halogen examination lights and other LED fixtures. Specifically designed for close examination and minor procedure lighting tasks, where a very powerful yet infinitely adjustable cool light is required, the ULED is the best possible solution for hospital wards, consulting rooms and clinics. A key ULED feature is a push button to detach the light head from the arm and so facilitate upgrade, exchange or maintenance without a technician.

New High output LED technology - Illumination intensity at 1m - 40,000+ lux

14w total power consumption

50,000 hour LED life (15-25 years normal use)

The ULED is suitable for Hospital wards, Consulting rooms, Medical Centres, Recovery rooms, Intensive Care (ICU/CCU)

Mounting options: Ceiling, Wall, Extended wall, Trolley and twin head

CRI 96 | Suitable for areas requiring compliance for Cyanosis Observation (AS/NZS 1680.2.5)

Easy clean IP65 membrane switch with ON/OFF switching and 4 stage dimming control

Australian designed and manufactured

ULED EXAMINATION LIGHT

Product Specification
