

The new Concord rectangular Astrale LED Shop lighter offers an energy saving alternative for new installations. Alternately, it provides a simple retrofit for current older Metal Halide technology fixtures widely used in commercial/retail applications.

The Astrale LED Shop lighter is currently available in 37 watt and 2 colour temperature options 3000k and 4000k

White and Black trim provided as standard.

The fitting features a powder coated, die-cast aluminium body with tempered hard frosted glass lens

The Astrale LED Shop lighter provides a 100° tilt ability for wall washing or beam direction

Complete with an on board LED driver and 1.0m standard flex and plug, the Astrale LED Shop lighter provides quick and easy installation

Cut out 225 x 130mm - Minimum clearance height.

Significant energy savings and reduced forward heat benefits are rewarded with cooler exposure for merchandise and displays
